# DevSlate Group - Synchronized requirements

Custom-Software Development - web,mobile apps, Blockchain, AI, Machine learning

Cyber Security, Compliance, Incident Response & Forensic Investigation

## Company first approach

Companies and organizations often face challenges in selecting and procuring the most effective cyber security, software development technology and effective resource operations.

## Matching your requirements

A significant part of our end-to-end approach is to take into account the processes, people and technology specific to your organization. Providing solutions that match individual requirements, budget, and help reduce both technical and market risk across the entire product development lifecycle.

**DevSlate Group** is a collaboration of companies for B2G and B2B created to boost innovation and development of products and solutions, fostering their export to the international markets. Our full service offerings enables us to provide one-stop solutions for our clients by seamlessly integrating:

1. Cyber Security, Compliance and Software Development expertise.
2. And full package of solutions in collaboration with our Blockchain, Cyber-Security, Compliance Solutions and Research Cluster (BCCS.tech): including CyberSecurity, Software development, Legal, Marketing, Insurance, Consulting organizations

## Our Partners:

Join the growing community of DevSlate Group and be part of our trusted strategic partner network!

among others...

## DefSlate.com

We strategically address the big picture by an in-depth approach to track, remediate potential hazards and threats by taking into account the processes, people and technology specific to your business.
By first addressing and understanding gaps, we create a strategic roadmap to enable execution, aligned to your individual requirements.

## Certified experts:

We dedicate a lot of our time and resources in finding the most skilled talent in the industry - our 15+ multinational cyber security specialists have one or more of the following cyber security certifications:

CISA - Certified Information Systems Auditor

CISM - Certified Information Security Manager

OSCP – Offensive Security Certified Professional

ECSA – EC-Council Certified Security Analyst

GPEN – GIAC Certified Penetration Tester

CEPT – Certified Expert Penetration Tester

CISSP - Certified Information Systems Security Professional

Our team members also hold the following Distributed Ledger Technology certifications:

CBP – Certified Bitcoin Professional

CBCP – Certified Blockchain Professional

## Assess & Prepare

**Discover risks that are missed by others**

We help to uncover/expose critical exploitable vulnerabilities and provide guidance for remediation, countermeasures.

- In-depth security Audits and Assessments
- Blockchain Smart Contract audits
- Penetration tests ("Pen. tests")
- Technology Architecture & Implementation

*Certified experts, including CISA, CISSP, OSCP, CCIE, CEPT among others*
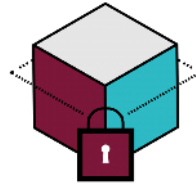

## Detect and prevent

**Effectively solve security and compliance requirements**

We assist you with establishing mechanisms and processes in place to enable information security & compliance

- Cyber security solutions / Implementation of security controls (ISO 27001 or other)
- Fintech Licensing (EMI/PI/E-money) licensing in Lithuania.
- Compliance audits for industry & regional legislative requirements (GDPR, PSD2, PCI-DSS, etc.)

*7+ years of experience in risk management and legal compliance*

## Analyze and respond

**Secure your assets from threats**

Our incident response and forensic investigation handling covers the effective management and identification of threats

- Incident response
- Forensic Investigation
- 24/7x365 monitoring and support
- Business Continuity
- Insurance for Cyber Security Risks, incidents

*30M+$ returned to our Customers by identifying the attack vectors, suspects details*

# Cyber Security Audits and Assessments
### Identify, Mitigate and Manage Cyber Security Risk

## CyberSecurity Audits and Assessments

We have an in-depth approach to track, remediate potential hazards and threats by taking into account the processes, people and technology specific to your organization.

◇ **Test your response and detection capabilities with a real breach attempt.**

◈ **Achieve returns on your execution efforts, improving security as well as demonstrating compliance.**

◈ **Evaluate protection for high-value systems, including external and/or internal cyber security processes and controls.**
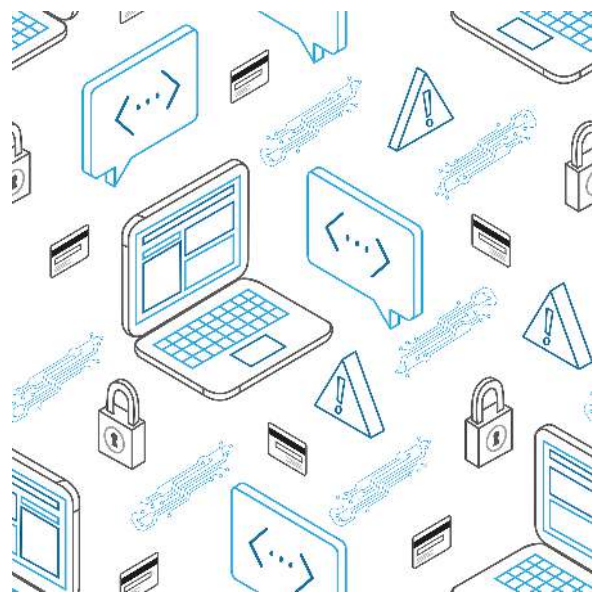

## Our In-depth Cybersecurity Audit Covers:

❖ **Vulnerability assessment -** in critical security domains;

❖ **Penetration testing -** vulnerabilities in infrastructure and applications;

❖ **Social engineering test -** crafted with specific organizational goals and rigor in mind;

❖ **Compliance audit -** focused on legal & compliance requirements;

❖ **In-depth report** including executive briefing, vulnerability observations and recommendations, cyber security program improvement roadmap;

# Compliance audits and solutions

DefSlate

## DevSlate.com

We develop highly secure and scalable software solutions designed to meet your specialized business needs. Whether the solution is standard, tailored, or custom, we have the knowledge and expertise to provide you with a best practices solution.
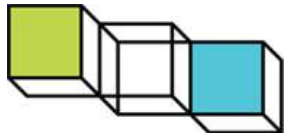

### Web, mobile applications

By leveraging full life-cycle software development approach we combine, analysts, software engineers, and security experts who are highly skilled in building apps in all major platforms or custom solutions.
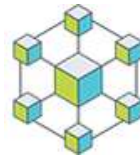

### Blockchain

We help you identify the use cases suitable for Blockchain applications, relevant to your organization and implement them using using cryptography, and distributed ledger technology.

### Dedicated Teams

The dedicated team approach allows unparalleled resource scalability and overhead cost reducement. We provide full project transparency and project tracking systems.

### We provide solutions for:

- ❖ Fintechs (Payment systems, Digital/P2P Lending, Cryptocurrency/Forex exchanges)
- ❖ E. learning
- ❖ E. commerce
- ❖ Corporate Websites
- ❖ Blockchain-based solutions: Smart contract development / Audits, Private blockchain development, Application development

Symfony    React    ANGULARJS    Sass {less}    iOS    android

PRESTASHOP    HTML5    WordPress    Java    php    and more...

# Let's work together

Tell us about your project, and we'll be in touch right away, ready to start execution!
